Hi Supreetha
partner reply as below.
Thank you so much!

-
1. Device is Android 10 device, do not have way to pack in new GMSCore for test.
 2. Device can't update the GMSCore for test through Google Play Store. (pls find attached play store update fail picture, no update shows)
 3. current GMSCore version running TVTS failed, pls find attached log.

Hi Supreetha,
provide below info for your reference too.

Currently no way to download the new GMS Core.
This device OS is Android 10, in Google help center we can only find GmsCore to 24.26.32 (080306-650348549), there is no newer version for SW to pack in.
path : https://partner-android.googlesource.com/platform/vendor/google_gtvs/+2b24492fbcd0239e469737666c647cec2f4e1bf2

partner used to check with Google for this GMSCore update issue, at that time Google suggest update to Android 11 for approval.
But customer do not agree for upgrade device to Android 11. So need to apply waiver for android 10 device and release the SW to end user ASAP.
history ticket : 472375506 (<https://partnerissuetracker.corp.google.com/issues/472375506>)

Thank you so much!

Hi @saichandm@google.com,

Could you please check and let us know if we can use a separate version for Android Q devices?

Hi @cathy_liu3@pegatron.corp-partner.google.com ,

Please use this build for Q version devices and let us know if it's stail failing with version mismatch issues
